From its inception in 1866 150 years ago, the American University of Beirut (AUB) has been a profoundly international and intercultural institution: chartered in New York, yet located in the Near East; based on the American liberal arts model of higher learning, yet also offering professional training to enrich the lives of its diverse peoples and to prepare generations of leaders across the region. A teaching-centered research university, AUB stresses high academic standards and is committed to critical thinking, open debate, and mutual tolerance.

The University encourages freedom of thought and expression and seeks to graduate men and women committed to creative and critical thinking, lifelong learning, personal integrity, civic responsibility, and leadership.

The Liberal Arts

In addition to acquiring the knowledge and skills they will need to excel professionally in their chosen careers, AUB students also explore different disciplines while completing 36 credits of general education requirements in English and Arabic; the humanities; economics and social sciences; and science, math, and technology.

Students and faculty engage in collaborative research in all the faculties and in several specialized centers.

“...The legacy of this remarkable, world class institution is evident in the breadth and depth of contributions its faculty, students and alumni have made to every aspect of life in Lebanon, the region and the world.”
