Jazz talks, stimulates, and paints!

As the guitarist strummed, the artist splattered water or paint on a transparency on an overhead projector, which beamed the image on a large screen in the Charles W. Hostler Student Center Auditorium. READ MORE

AUB-led regional study makes recommendations to overcome threat of dwindling water resources

Dams should be built to better manage and conserve Lebanon’s water resources, and farmers should be trained on water usage in order to help Lebanon preserve its dwindling water resources, according to an AUB-led study whose findings were revealed. READ MORE
