

The Numbers Tell the Story

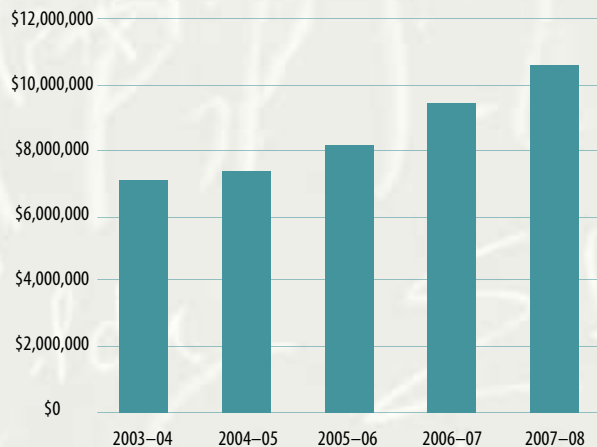

AUB has significantly increased the amount it awards for financial aid from \$7,011,216 in 2003-04 to \$10,633,446 in 2007-08—an increase of more than 50 percent.

Although this has enabled us to increase the size of the average financial aid award during this period from \$3,272 to \$3,986, many students do not receive all the support they need.

In addition, there has been an almost 25 percent increase (from 2,656 to 3,300) in the number of students requesting financial aid. Because of this growing demand and our limited resources, we are only able to provide support to 80 percent of the students who request financial assistance.

We need your help in order to provide an AUB education for all academically qualified students—regardless of their financial circumstances—in an atmosphere of broad social, economic, and intellectual diversity.
