Challenges in the Diagnosis and Management of Bleeding Disorders
Hemostasis Round
Round 3: Riviera Hotel, Beirut
February 1, 2014

Syllabus

Supported by an unrestricted educational grant from Novo-Nordisk
Challenges in the Diagnosis and Management of Bleeding Emergencies

Overview
This activity will provide updated information on how to diagnose and manage congenital or acquired coagulopathies. A total of 4 sessions have been planned where 2 sessions were held in Saida and Qalamoun. Two more sessions remain for Bekaa and Beirut.

Location and Date
The third round is held in Beirut on February 1, 2014 at the Riviera Hotel.

Educational Objectives
After completing this activity, the participant will be able to:

- Describe the cellular-based model of hemostasis
- Interpret the diagnostic tests for patients at risk of bleeding
- Identify the therapeutic approaches to the prevention and treatment of bleeding in the following clinical situations: acquired hemophilia, postpartum hemorrhage, rare factor deficiencies (FVII or FXIII), massive bleeding management at the Intensive care unit.

Target Audience
This activity has been designed to meet the educational needs of emergency medicine specialists, intensive care specialists, anesthesiologists, pediatricians, OGYN specialists, laboratory medicine specialists and other healthcare professionals involved in the management of patients at risk for congenital or acquired coagulopathy.
