Challenges in the Diagnosis and Management of Bleeding Disorders

Hemostasis Round
Round 4: Massabki Hotel, Shtoura
March 29, 2014

Syllabus
Challenges in the Diagnosis and Management of Bleeding Emergencies

Overview
This activity will provide updated information on how to diagnose and manage congenital or acquired coagulopathies. A total of 4 sessions have been planned where 3 sessions were held in Saida, Qalamoun and Beirut. The final session remains for Bekaa area.

Location and Date
The 4th and last round is held in Shtoura on March 29, 2014 at the Massabki Hotel.

Educational Objectives
After completing this activity, the participant will be able to:

• Describe the cellular-based model of hemostasis
• Interpret the diagnostic tests for patients at risk of bleeding
• Identify the therapeutic approaches to the prevention and treatment of bleeding in the following clinical situations: acquired hemophilia, postpartum hemorrhage, rare factor deficiencies (FVII or FXIII), massive bleeding management at the Intensive care unit.

Target Audience
This activity has been designed to meet the educational needs of emergency medicine specialists, intensive care specialists, anesthesiologists, pediatricians, OGYN specialists, laboratory medicine specialists and other healthcare professionals involved in the management of patients at risk for congenital or acquired coagulopathy.
