AUB held the Fourth Annual Open House for Graduate Studies

The event was hosted on AUB campus on February 3rd, 2016. It was attended by more than 325 participants from local, regional and international universities and companies. The unique event was a great opportunity to familiarize potential candidates with the Master's and PhD degrees offered at AUB as well as the scholarships available to students, English preparatory classes and guidelines for submission of admission applications. AUB to offer MENA’s first MS in Food Security

The MS in Food Security is a graduate level degree program that provides students with a deeper understanding of food security through an interdisciplinary approach. Students will learn about the challenge of food security; its connection to agricultural value chains, human nutrition, environmental sustainability, and economic development; and how policies can be developed to address and improve food security. In support of Teach For Lebanon initiative and believing in its mission, AUB agrees to establish scholarship fund under the name AUB-Teach For Lebanon Graduate Scholarships
biomedical research performed at AUB and providing an intellectual environment and platform for scientific exchange among various AUB researchers fostering collaboration within AUB. Read More

The AUB-Teach For Lebanon Graduate Scholarships fully supports the tuition of full-time graduate students recommended by Teach For Lebanon, as long as the students meet the admission requirements of AUB within the university deadline, and who are deemed worthy of financial assistance as determined by the AUB office of Financial Aid. Students who will be candidate to receive this scholarship would have served for at least two years through the Teach For Lebanon program. Read More

Doctoral students sharing graduate life and research experiences at AUB

Crystal Ghantous
PhD, Biomedical Sciences, Hypertension-induced Vascular Remodeling

How I got here: I entered AUB to study Biology, hoping to go into medicine. Towards the end of my sophomore year, I realized I like doing research more than clinical work. I applied to the physiology master's program immediately after graduation and worked with Professor Asad Zeidan on my master's thesis. Then they relaunched the PhD program in Biomedical Engineering, which I entered as one of three students.

What I’ll remember most about AUB: I’ll remember the friendship I’ve made here, the relationships, the hard work I’ve put in. By the time I graduate, I’ll have spent 10 years at AUB. Read More

Mostafa Hammoud
PhD Physics, Magnetic Reconnection

How I got here: I’ve been at AUB since 2010. I finished my bachelor’s at Lebanese University. Then I became a graduate assistant so I could afford to study at AUB.

What I’ll remember most about AUB: Once you enter campus, you relax. Bliss street has lots of traffic, but not inside AUB. Read More

AUB Visiting Students expressing satisfaction

Life in Lebanon requires flexibility and adaptability along with amazing opportunities to enjoy life and to travel throughout the country and the region. Exploring the Middle East through living experiences can never be replaced by reading a book. Read More
