Department of Physics

Chairperson: Isber, Samih T.
Professor Emeritus: Mavromatis, Harry A.
Professors: Bitar, Khalil M.; Chamseddine, Ali H.; El Eid, Mounib F.; Isber, Samih T.; Klushin, Leonid I.; Sabra, Wafic A.; Tabbal, Malek D.; *Touma, Jihad R.
Associate Professors: Antar, Ghassan Y.; Christidis, Theodore C.
Assistant Professor: Kazan, Michel J.
Lecturers: *Bodakian, Berjouhi H.; *Ghamlouche, Hassan J.; *Roumideh, Mohammad A.; *Said, Aurore J.

The department provides facilities for graduate work leading to the MS and PhD degrees. The research activities of the department include material science, condensed and soft matter physics, plasma physics, paramagnetic resonance, non-linear dynamics, astrophysics, high energy physics, superstring theory, and quantum gravity.

MS in Physics

The MS program requires the completion of 21 credits of courses and a thesis. The courses consist of four core courses: PHYS 301, PHYS 302, PHYS 303, and PHYS 305, and nine credits of physics graduate electives. After completion of the four core courses, the student must pass a Master's Comprehensive exam. The student must then select a thesis adviser who will present the thesis proposal to the department chair for approval. The MS degree is granted after the student defends his/her thesis successfully.

PHYS 301 Classical Mechanics 3.0; 3 cr.
D’Alembert’s principle, variational principles and Euler Lagrange’s equations, rigid bodies and small oscillations, Hamilton’s mechanics, canonical transformations and Hamilton-Jacobi theory, stability, integrable systems, and chaotic motion. Annually.

PHYS 302 Statistical Mechanics 3.0; 3 cr.
Boltzmann distribution, density matrix, statistical ensembles, Fermi-Dirac and Bose-Einstein statistics and applications, phase transitions, mean-field theory, and applications. Annually.

PHYS 303 Electromagnetic Theory 3.0; 3 cr.
Boundary-value problems in electrostatics, multipoles, dielectrics, magnetostatics, time-varying fields and Maxwell’s equations, and electromagnetic waves. Annually.

PHYS 305 Quantum Mechanics 3.0; 3 cr.
Hilbert space formulation of quantum mechanics, theory of angular momentum, Euler rotation, addition of angular momenta; symmetries and conservation laws: time reversal, parity, discrete symmetry; path integral formulation of quantum mechanics; approximation methods; identical particles; elementary scattering theory; introduction to relativistic quantum mechanics. Annually.

* On leave, Spring 2012–13 and Fall 2013–14
* Part time
PHYS 310  Special Topics  3.0; 3 cr. (each)
May be repeated for credit. Annually.

PHYS 330  Principles of Environmental Physics  3.0; 3 cr.
Scope of environmental physics, review of gas laws, transport laws, radiation environment, microclimatology of radiation, momentum transfer, heat transfer, mass transfer, steady state heat balance, crop meteorology, energy for human use, and environmental spectroscopy. Not open to physics graduate students. Prerequisites: PHYS 204 and 205 or equivalent and some knowledge of calculus. Annually.

PHYS 391  Graduate Tutorial  1–3 cr. (each)
May not be repeated for credit.

PHYS 395A/395B  Comprehensive Exam  0 cr.
Prerequisite: Consent of adviser.

PHYS 399  MS Thesis  9 cr.

Doctor of Philosophy in Theoretical Physics

Mission Statement

The PhD program in the Department of Physics is intended to produce competent independent researchers who are able to make original contributions to physical sciences. The program prepares students for careers in research, teaching, or industry and thus provides qualified scientists for Lebanon and the region. It serves the AUB mission of promoting research and participating in the advancement of knowledge.

Admission

Admission to the PhD program is on a competitive basis. To be eligible for admission, applicants must have an excellent academic record, and demonstrate exceptional motivation and ability to pursue research in physics. The following items are required for an application:

- For the Regular Track*: A Master’s (MS) degree in Physics or related fields from an institution recognized by AUB;
- For the Accelerated Track*: A bachelor’s (BS) degree in Physics or related fields from an institution recognized by AUB;
- Three letters of recommendation;
- GRE is not required;
- Refer to English Language Proficiency Requirements (ELPR) page 37;
- A statement of purpose; and
- A recommendation for admission by the AUB Department of Physics. A departmental committee may require an interview with the applicant before giving a recommendation.

* Refer to the Study Section under General University Academic Information
Governance

The PhD program is proposed as a full-time 5 year program, with a maximum of 7 years permitted for its completion. The governance of the program commences with the application process. Upon admission into the program, a graduate student is assigned an academic adviser who evaluates his/her academic background, designs a curriculum to meet the student’s research interests and career goals, and advises if undergraduate courses are needed to rectify deficiencies. All of the duties of the academic adviser will be transferred to the thesis adviser chosen by the student and approved by the department. The thesis adviser must be chosen within 3 semesters from the admission to the program.

Supervision of PhD Thesis

Academic Adviser guides and helps the student plan a course of study and recognize a thesis adviser. The thesis adviser must be a full-time professorial rank faculty member. The PhD thesis proposal and the committee should be formed at least two semesters before the thesis defense. The thesis committee should be conforming to the AUB policy and the requirement of the Lebanese Ministry of Higher Education as described in details under the PhD Thesis Committee section of the General University Academic Information.

Course Work

The PhD program requires the completion of at least 39 credits hours of course work for students admitted on the accelerated track (BS holders) and a minimum of 18 credit hours of course work for students admitted on the regular track (MS holders).

The required courses for students admitted on the accelerated track are: PHYS 301, 302, 303, 305, 306 and 307 (18 credits), and at least 21 credits beyond the core program, out of which one course must be in the concentration area, while the others can be taken as electives. Students may take relevant courses outside the department provided they secure departmental approval.

The required courses for students admitted on the regular track are: PHYS 306 and 307 (6 credits), and at least 12 credits beyond the core program, out of which one course must be in the concentration area, while the others can be taken as electives. Students may take relevant courses outside the department provided they secure departmental approval.

PhD Qualification Exam Part I and Part II

Upon completion of a minimum of 15 credits of graduate course work including the four core courses: PHYS 301, 302 303 and 305 with a cumulative average of 85 or above in the core courses, the student may sit for PhD Qualification Exam Part I (written comprehensive examination) to determine a written comprehensive examination to determine whether he/she has acquired the background necessary to continue in the PhD program.

After choosing a thesis adviser, the student should pass the PhD Qualification Exam Part II; the student must formulate, submit and defend a thesis research proposal to demonstrate a capacity to pursue and complete a doctoral research project.

Candidacy

Refer to the Admission to Candidacy section under “General University Academic Information” on page 64.
PhD Thesis and Thesis Defense
After qualifying as a PhD candidate, the student will focus on the doctoral research. The PhD thesis is based on independent original research. The doctoral research, once completed, will be presented publicly and defended in front of the thesis committee. The thesis committee will consist of four members, all of professorial rank, with at least one member from outside AUB.

Residence Requirements
See Residence Requirements section under “General University Academic Information” on page 63.

Graduation Requirements
A student is granted the PhD degree upon approval of his/her PhD thesis by the thesis committee in a public session. In addition to the general graduation guidelines specified by the University, the Physics Department also requires that part of the PhD thesis work be published or accepted for publication in a refereed journal by the time of graduation.

Timetable
A student is expected to abide by the following time table:

• Finish the graduate course work (a minimum of 39 credits after the BS) within 8 semesters of starting the graduate study program;
• Pass the qualifying exam upon completion of 15 credits, within 3 semesters of starting the graduate study program;
• Choose a thesis adviser within 3 semesters of starting the graduate study program;
• Defend the PhD thesis proposal within 6 semesters and advance to candidacy within 7 semesters of starting the graduate study program; and
• Present his/her research work by submitting his/her thesis to the thesis committee and defending it in a public session. The total length of the PhD should not exceed 7 years.

Financial Support
The department offers, on a selective basis, substantial support which fully covers tuition and includes a monthly stipend. There are also some funds available to support participation in international conferences; these funds are awarded on a competitive basis. In return, students help in teaching undergraduate labs and recitations of introductory courses. Their duties also include help in proctoring and correcting exams.

Course Descriptions

PHYS 301  Classical Mechanics  3.0; 3 cr.
D’Alembert’s principle, variational principles and Euler Lagrange’s equations, rigid bodies and small oscillations, Hamilton’s mechanics, canonical transformations and Hamilton-Jacobi theory, stability, integrable systems and chaotic motion.

PHYS 315  Particle Cosmology  3.0; 3 cr.

PHYS 316  Physics of Soft Matter  3.0; 3 cr.

PHYS 317  Group Theory and Symmetry in Physics  3.0; 3cr.

PHYS 318  Standard Model of Particle Physics  3.0; 3 cr.

PHYS 319  String Theory  3.0; 3 cr.

PHYS 322  Thin Films Physics  3.0; 3 cr.
Introduction to surface and thin films physics: definitions; importance in basic research; impact on technology and society. Ultra High Vacuum Techniques and Processes: Kinetic theory concepts; Surface preparation procedures; Surface chemical composition: XPS, AES, SIMS, GIXRD. Thin film deposition: Evaporation; Plasma, laser and ion beam processing; Physical and Chemical Vapor Deposition techniques. Surface morphology and physical structure: Surface energy; reconstruction; 2-D lattices; Nucleation and growth of thin films; Microscopy techniques. Theory of surface scattering; Inelastic scattering and dielectric theory; Electron-based techniques: LEED and RHEED; RBS. Epitaxy: atomistic models and rate equations; steps, ripening and interdiffusion; HRXRD. Conduction and Magnetism in thin films; Superconductivity; Optical and mechanical properties. Pre- or corequisite: PHYS 302.

PHYS 323  Plasma Physics  3.0; 3 cr.
The motion of a single particle (electron or ion) subject to electromagnetic forces; fluid equations for electrons and ions; guiding center description; collisional phenomena occurring in plasmas and the resultant diffusion; propagation of high and low frequency electromagnetic waves in plasmas; description of the plasma as a single fluid; the magneto-hydromagnetic (MHD) equations; MHD instabilities and their effects on the plasma; Applications of plasma physics. Pre- or corequisite: PHYS 303.
PHYS 324  Electron Paramagnetic Resonance  3.0; 3 cr.
The electronic Zeeman interaction and the resonance phenomenon, Group theory-the rotation
group, the spin-Hamiltonian and the spectrum, the Lanthanide 4f Group, the actinide 5f, Ions
of the 3d group in intermediate Ligand Fields and some Experimental aspects of EPR. Pre- or
corequisite: PHYS 305.

PHYS 480  Qualifying Exam Part I: Comprehensive Exam  0 cr.
Every Semester

PHYS 481  Qualifying Exam Part II: Defense of Thesis Proposal  0 cr.
Every Semester

PHYS 482*  PhD Thesis  24 cr.
Every Semester. Taken at first thesis registration, then registered for every subsequent semester
with sequential letter annotations (a-l; 0 credits) until completion of thesis work.

PHYS 483*  PhD Thesis  27 cr.
Every Semester. Taken at first thesis registration, then registered for every subsequent semester
with sequential letter annotations (a-l; 0 credits) until completion of thesis work.

PHYS 484*  PhD Thesis  30 cr.
Every Semester. Taken at first thesis registration, then registered for every subsequent semester
with sequential letter annotations (a-l; 0 credits) until completion of thesis work.

* The choice to register for PHYS 482, 483, or 484 should be done in consultation with thesis advisor to ensure that total number of PhD
thesis credits and PhD course credits are met as per AUB rules and regulations.
