Department of Physics

Chairperson: Tabbal, Malek D.
Professors: Bitar, Khalil M.; Chamseddine, Ali H.; El Eid, Mounib F.; *Klushin, Leonid I.; Sabra, Wafic A.; Tabbal, Malek D.
Visiting Professor: Mavromatis, Harry, A.
Associate Professors: Isber, Samih T.; Touma, Jihad R.
Assistant Professor: Antar, Ghassan Y.
Research Associate: Christidis, Theodore C.
Senior Lecturer: *Nasrallah, Nasrallah F.
Lecturers: *Bodakian, Berjouhi H.; *Roumieh, Mohammad A.

Undergraduate Program

The Department of Physics offers courses at the undergraduate level leading to a bachelor's degree in physics.

The requirements for a BS in Physics are 90 credits for students entering at the Sophomore level. The distribution of these courses are as follows:

1) Department Requirements

- 36 credits in Natural Sciences (24 credits required Physics courses; 6 credits elective Physics courses; 6 credits required Physics Lab courses).
  37 credits if PHYS 228 is chosen as an elective.
- 13 credits in Qualitative Thought (9 credits in Math; 4 credits in CMPS 200 or EECE 230).
- 14 credits in free electives

2) University Requirements

- Language Requirements: 9 credits in Language requirements (3 credits in Arabic; 6 credits in English - Eng. 203 and Eng. 204).
- General Education Requirements: 12 credits in Humanities (including 6 credits in CVSP) and 6 credits in Social Sciences.

The program for the physics major includes the following required courses: PHYS 210, PHYS 210L, PHYS 212, PHYS 217, PHYS 220, PHYS 221L, PHYS 222, PHYS 226, PHYS 235, PHYS 236, and PHYS 257L. Moreover, two elective courses must be selected from PHYS 223, PHYS 228/228L, PHYS 231, PHYS 232, PHYS 248, PHYS 249. Also required are the following courses in mathematics: MATH 101, MATH 102, CMPS 200, MATH 201, MATH 202, and MATH 212.

* On Leave
P Part time
Freshman students who intend to major in Physics should complete PHYS 101 and PHYS 101L (or their equivalent).

Physics majors must obtain a cumulative average of at least 70 in the physics courses normally taken in the sophomore year (PHYS 210, PHYS 210L, PHYS 212) and a cumulative average of at least 70 in MATH 201 and 202 before they are allowed to proceed to junior level courses. Students who wish to transfer to physics must fulfill the criteria listed above.

No physics major is allowed to register in physics courses numbered 217 and above for a third time. Physics majors whose physics average falls below 70 or whose cumulative average in Math 201 and 202 is below 70 will be placed on departmental probation. If this probation is not removed within two semesters, the student will be dropped from the department.

The Department of Physics offers a minor in physics comprised of one of the following sequences:

Sequence 1: PHYS 210, PHYS 210L, PHYS 211 (or PHYS 220), PHYS 212, PHYS 217, PHYS 221L, and PHYS 236 (18 credits)

Sequence 2: PHYS 210, PHYS 210L, PHYS 211 (or PHYS 220), PHYS 212, PHYS 217, PHYS 228, and PHYS 228L (17 credits)

PHYS 101, PHYS 101L, PHYS 210, PHYS 210L, PHYS 211, PHYS 211L, and PHYS 212 are introductory courses for students of chemistry or engineering.

PHYS 103, PHYS 204, PHYS 204L, PHYS 205 and PHYS 205L are introductory courses for students in nursing, public health, biology, petroleum studies, and for students wishing to enter the medical school but are not physics or chemistry majors.

PHYS 204, PHYS 204L, PHYS 205 and PHYS 205L are not equivalent totally or in part to the following: PHYS 210, PHYS 210L, PHYS 211, PHYS 211L or PHYS 212. Students shall receive credit for courses in only one of the preceding two sets.

PHYS 101 Introductory Physics I 4.0; 4 cr.
Measurements, motion in one dimension, vectors, motion in two dimensions, Newton's laws with applications, work and energy, circular motion, linear momentum and collisions, rotation and angular momentum, oscillations, gravity, and elements of fluid mechanics. Students shall receive credit for only one of PHYS 101 or PHYS 103. Pre- or corequisite: MATH 101. Annually.

PHYS 101L Introductory Physics Laboratory I 0.2; 1 cr.
Error analysis, measuring devices, speed and acceleration, measurement of gravitational acceleration, forces, friction, circular motion, conservation of momentum, conservation of energy, ballistic pendulum, rotation, and simple harmonic motion. Pre- or corequisite: PHYS 101. Annually.

PHYS 103 Physics for the Life Sciences 3.0; 3 cr.
Units and dimensions, scalars and vectors, kinematics in one and two dimensions, dynamics, work and energy, collisions, gravitation, and rotational motion. Students shall receive credit for only one of PHYS 101 or PHYS 103. Each semester.

PHYS 200 Understanding the Universe 3.0; 3 cr.
An introductory course in astronomy restricted to undergraduate non-science students. Basic astronomical tools, properties of the earth, solar system, sun, electromagnetic radiation, properties and evolution of stars, and the Milky Way galaxy. Annually.

PHYS 204 Classical Physics for Life Sciences 3.0; 3 cr.
Fluids, heat and heat engines, gas dynamics, wave phenomena, and sound and light. Prerequisite: PHYS 103 (or equivalent). Annually.
PHYS 204L Classical Physics for Life Sciences Laboratory 0.2; 1 cr.
Techniques of laboratory work, surface tension, coefficient of viscosity, gas thermometer, Boyle’s law, adiabatic compression of gases, mechanical equivalent of heat, waves on a stretched string, standing waves in air columns, geometrical optics I: reflection and refraction, geometrical optics II: mirrors and lenses, Michelson interferometer, and interference and diffraction. Pre- or corequisite: PHYS 204. Annually.

PHYS 205 Modern Physics for Life Sciences 3.0; 3 cr.
Electricity: electric field and electric potential, electric current and circuits, and capacitance. Magnetism: magnetic field, magnetic materials, electromagnetic induction, electromagnetism applied to biological systems, introduction to special relativity, atoms and atomic structure, nuclei, and radioactivity. Prerequisite: PHYS 103 (or equivalent). Annually.

PHYS 205L Modern Physics for Life Sciences Laboratory 0.2; 1 cr.
Electric field mapping, capacitance and dielectric constants, basic oscilloscope operations, Wheatstone bridge, RC and RL circuits, measurements of magnetic induction fields, measurement of the charge to mass ratio of electrons, RC and RLC-circuits, Ohm’s law, Planck’s constant, atomic spectroscopy, and classical scattering. Pre- or corequisite: PHYS 205. Annually.

PHYS 210 Introductory Physics II 3.1; 3 cr.
Review of classical mechanics, fluid statics, fluid dynamics, temperature, heat and first law of thermodynamics, kinetic theory of gases, heat engines, entropy and second law of thermodynamics, general properties of waves, sound waves and resonances, light and optics, interference, diffraction, and polarization. Pre- or corequisite: MATH 201. Each semester.

PHYS 210L Introductory Physics Laboratory II 0.2; 1 cr.
Surface tension, gas thermometer, mechanical equivalent of heat, Boyle’s law, adiabatic compression of gases, measurement of gamma for air and fluid gas, standing waves on a stretched string, standing waves in air columns, geometrical optics: law of refraction and prism, mirrors and lenses, interference and diffraction, the spectrometer, and polarization. Pre- or corequisite: PHYS 210. Each semester.

PHYS 211 Electricity and Magnetism 3.0; 3 cr.
Electrostatics, current, resistance, Ohm’s law, Kirchhoff’s laws, RC circuits, magnetostatic theory, Ampere’s law, Biot-Savart law, Faraday’s law, LR circuit, RLC circuits, and a qualitative discussion of Maxwell’s equations. Pre- or corequisite: MATH 201. Each semester.

PHYS 211L Electricity and Magnetism Laboratory 0.2; 1 cr.
Electric fields, capacitance and dielectric constant measurements, construction and calibration of ammeter and a voltmeter, electrical circuits, Wheatstone bridge, potentiometer, Thomson’s experiment, measurement of the force between two parallel current-carrying conductors, measurement of magnetic induction fields, basic oscilloscope operations, RL, RC, and RLC circuits. Pre- or corequisite: PHYS 211. Each semester.

PHYS 212 Modern Physics 3.0; 3 cr.
Special theory of relativity, introductory quantum mechanics, atomic physics, nuclear physics, and introduction to elementary particles. Students cannot receive credit for both PHYS 212 and CHEM 218. Pre- or corequisite: MATH 201. Each semester.

PHYS 217 Mechanics 3.0; 3 cr.
PHYS 220  Electromagnetic Theory  3.0; 3 cr.
Electrostatics: electric potential, Gauss’ law, Poisson’s and Laplace’s equations, boundary conditions, electric currents, Faraday’s law, Lenz’s law, mutual inductance. Maxwell’s equations, and propagation of electromagnetic waves. Prerequisite: MATH 202. Annually.

PHYS 221L  Junior Laboratory  0.4; 2 cr.
A course of experiments selected from the topics of diffraction, e/m ratio, magnetic field, RL, RC, RLC circuits, ohmic and non-ohmic devices, atomic spectroscopy, Milikan’s experiment, Frank-Hertz experiment, speed of sound, gravitational acceleration, Planck’s constant, and physical optics. Prerequisite: Junior standing. Annually.

PHYS 222  Computational Physics  0.3; 3 cr.

PHYS 223  Physical Optics  3.0; 3 cr.
Wave theory of light, Maxwell’s equations, superposition and polarization, interference, interferometers, diffraction, coherence, lasers, and holography. Annually.

PHYS 226  Solid State Physics  3.0; 3 cr.
Electrons in one-dimensional periodic lattice, vibrations in one-dimensional periodic lattice, geometrical description of crystals, free-electron theory in metals, excitons, plasmons, polarons, lattice dynamics, semi-conductors, magnetic ordering, superconductivity, and electron gas in a magnetic field. Prerequisites: PHYS 235 and PHYS 236. Annually.

PHYS 228  Electronics  3.0; 3 cr.
DC linear circuits, capacitors, inductors and transients, periodic waveforms, diodes, power supplies, operational amplifier, logic gates, timers, multiplexers, flip-flops, and counting circuits. Students may not get credit for this course unless they pass PHYS 228L. Annually. Fall semester.

PHYS 228L  Electronics Laboratory  0.3; 1 cr.
DC measurements, periodic waveforms, power supplies, transients, frequency and period measurements, operational amplifiers, and some digital circuits. Pre- or corequisite: PHYS 228. Each semester.

PHYS 231  Special Topics  3.0; 3 cr.
May be repeated for credit. Prerequisite: Consent of department.

PHYS 232  Special Topics  3.0; 3 cr.
May be repeated for credit. Prerequisite: Consent of department.

PHYS 235  Statistical Physics  3.0; 3 cr.
PHYS 236  Quantum Mechanics  3.0; 3 cr.
Fundamental concepts: Bras, Kets, matrix representation of operators, change of basis; quantum
dynamics: time evolution of quantum mechanical systems, spin; translational and rotational
symmetry: Schroedinger equation in one and three dimensions; spherical symmetric systems: three-
dimensional oscillator, hydrogen atom; theory of angular momentum: rotation operator, addition of
angular momenta; time-independent perturbation theory, Zeeman effect, Stark effect, spin-orbit
coupling, time-dependent perturbation theory, variational methods. Prerequisites: MATH 212 or MATH
224 (or equivalent) and PHYS 212. Annually.

PHYS 248  Undergraduate Seminar  1.0; 1 cr.
Prerequisite: Senior standing. Annually.

PHYS 249  Nuclear and Elementary Particle Physics  3.0; 3 cr.
Introduction to scattering theory, nuclear phenomenology, nuclear models, nuclear radiation and
fission and fusion, detectors and accelerators, properties of elementary particles, symmetries and
transformations, and the standard model of elementary particles. Prerequisites: Senior standing or
consent of department. Annually.

PHYS 257L  Advanced Laboratory  0.6; 3 cr.
A weekly lecture on instrumentation and a selection of six to eight experiments from the following
list: transient and steady states of SH-oscillator, coupled oscillators bridge circuits, speed of
sound in liquid, prison spectrometer, Frank–Hertz experiment, Planck constant, Currie temperature,
magnetic susceptibility, measurement of gravitational acceleration, speed of light, Milikan’s drop oil
experiment, the Hall effect, optics, the Faraday effect, and nuclear magnetic resonance. Prerequisite:
PHYS 221L. Annually.
