Department of Mathematics

Chairperson: Abu-Khuzam, Hazar M.
Professors Emeriti: Hanna, Azmi; Kennedy, Edward S.; Muwafi, Amin; Yff, Peter
Associate Professor: Brock, Friedemann R.
Assistant Professors: Alhakim, Abbas M.; Azar, Monique E.; El Khoury, Sabine S.; Raji, Wissam V.; Tlas, Tamer M.
Visiting Assistant Professor: Egeileh, Michel Y.
Lecturers: Fayyad, Dolly J; Kobeissi, Mohammad A; Yamani, Hossam A.

The Department of Mathematics offers programs leading to the degrees of Bachelor of Science (BS) and Bachelor of Arts (BA) in Mathematics, in Applied Mathematics, and in Statistics. It also offers programs leading to the degree of Master of Science (MS) in Mathematics.

Undergraduate Program

Mission Statement

The Department of Mathematics subscribes to the view that “Mathematics as an expression of the Human mind reflects the active will, the contemplative reason, and the desire for aesthetic perfection.” Through the different fields of Algebra, Analysis, Geometry, Number Theory, Statistics, and Applied Mathematics, the Department aims to train students in quantitative reasoning, in dealing with abstraction, in enhancing their sense of formalism, in tackling Mathematical problems, and in writing clear and rigorous proofs. The training will help the student acquire a sound balance between abstract generality and colorful individuality, and between the qualitative and quantitative aspects of Mathematics. It also will help the student master the theory through a clear comprehension of the theoretical aspects, but without losing sight of applications. Graduates of the Mathematics Department should be well placed to work in various professional areas of Education, Finance, Information Technology, or for pursuing graduate studies in Mathematics or a related area.
BA or BS in Mathematics

The department requires nine credits in courses numbered 200 or above in the sciences for the BS degree, and at least nine credits in courses numbered 200 or above in the arts (humanities or social sciences) for the BA degree. In both cases it is recommended that at least six of these nine credits be in disciplines that use quantitative methods, and be chosen in conjunction with the student’s faculty adviser. In addition, the departmental requirements are as follows:

MATH 201, MATH 210, MATH 214, MATH 219, MATH 223, MATH 227, MATH 233, MATH 241, and at least one of MATH 220 or MATH 242 and 12 more credits chosen from MATH 202 and mathematics courses numbered 213 or above. In addition, students must take CMPS 200, which is a first course in programming.

University Requirements

- University language requirements: nine credits of English and Arabic.
- University General Education requirements: 12 credits in Humanities; six credits in Social Sciences (covered by the departmental requirements for BA); six credits in natural sciences (covered by the departmental requirements for BS); and three credits in Quantitative Thought (covered as a Math major).

A transfer student who has done well in MATH 218 can count it toward the mathematics major instead of MATH 219, subject to departmental approval. In such a case, the department will usually require the student to take MATH 220.

Students wishing to pursue graduate study in mathematics are strongly urged to take, MATH 220, MATH 242, and MATH 213 or MATH 216. They may also want to consider taking one or more graduate course in their senior year. Students with an interest in applied mathematics are urged to take MATH 202, MATH 220, MATH 224, MATH 251, and MATH 234, and to choose their additional courses from those that include a significant use of mathematical techniques. Students interested in high school teaching are encouraged to include MATH 202, MATH 213, MATH 251, and MATH 261 among their courses.

A minor in mathematics requires 18 credits: MATH 201, MATH 210; either MATH 218 or MATH 219; and nine more credits in mathematics courses numbered MATH 202, MATH 211 or above, and statistics courses numbered 230 or above.

BA or BS in Applied Mathematics

A student opting for the program in Applied Mathematics can earn either a BA or a BS degree. The science requirements for the BS are fulfilled by at least 2 science courses (or 6 science credits) chosen in departments in the FAS; the arts requirements for the BA are fulfilled by 2 courses (6 arts credits) chosen in departments in the FAS. The Mathematics requirement is the same for both degrees and consists of 39 credits in Mathematics courses as follows:

MATH 201, MATH 202, MATH 210, MATH 218, MATH 223, MATH 224, MATH 227, MATH 233, MATH 251, MATH 281, and 9 more credits chosen from Mathematics courses numbered 211 and above.
In addition, the student will choose 9 credits in one applied discipline or track from the following list:

1- Computer Science  
2- Economics/Econometrics  
3- Natural Sciences  
4- Engineering and Health Sciences

**University Requirements**

- University language requirements: nine credits of English and Arabic.
- University General Education requirements: 12 credits in Humanities; six credits in Social Sciences (covered by the departmental requirements for BA); six credits in natural sciences (covered by the departmental requirements for BS); and three credits in Quantitative Thought (covered as a Math major).

A minor in Applied Mathematics requires 18 credits: MATH 201, MATH 210; either MATH 218 or MATH 219; and nine more credits in mathematics courses numbered MATH 202, MATH 211 or above, and statistics courses numbered 230 or above.

**BA or BS in Statistics**

The department requires nine credits in courses numbered 200 or above in the sciences for the BS degree, and at least nine credits in courses numbered 200 or above in the arts (humanities or social sciences) for the BA degree. In both cases it is recommended that at least six of these nine credits be in disciplines that use quantitative methods, and be chosen in conjunction with the student’s faculty adviser. In addition, the departmental requirements are as follows:

**In statistics:** STAT 233, STAT 234, STAT 235, STAT 236, STAT 237 and STAT 238, and nine more credits chosen from MATH 202 and from mathematics, statistics, and computer science courses numbered 212 or above, excluding STAT 230

**In mathematics:** MATH 201, MATH 210, and MATH 218 or MATH 219

**In computer science:** CMPS 200

Students planning to go for higher education in statistics are advised to take their electives in advanced mathematics courses such as MATH 223 and MATH 227. Other students are encouraged to choose among their electives MATH 251 and other computing-oriented courses.

**University Requirements**

- University language requirements: nine credits of English and Arabic.
- University General Education requirements: 12 credits in Humanities; six credits in Social Sciences (covered by the departmental requirements for BA); six credits in natural sciences (covered by the departmental requirements for BS); and three credits in Quantitative Thought (covered as a Stat major).
It is to be noted that STAT 201, 210, and 230 are mainly service courses. STAT 201 is essentially equivalent to EDUC 227, and STAT 210 is essentially equivalent to ECON 213. Students can get credit for only one of the following: STAT 201, STAT 210, STAT 230, EDUC 227, ECON 213.

A minor in statistics requires 18 credits: MATH 201, MATH 210, and STAT 233, and nine more credits in statistics courses numbered 211 or above excluding STAT 230.

**Undergraduate Courses**

**Mathematics**

**MATH 101**  Calculus and Analytic Geometry I  3.1; 3 cr.
Limits, continuity, differentiation with application to curve plotting; Rolle’s theorem; integration with application to area, distance, volume, arc-length; fundamental theorem of calculus, transcendental functions. *Each semester.*

**MATH 102**  Calculus and Analytic Geometry II  3.1; 3 cr.
Methods of integration, improper integrals, polar coordinates, conic sections, analytic geometry in space, parametric equations, and vector functions and their derivatives. *Prerequisite: MATH 101. Each semester.*

**MATH 201**  Calculus and Analytic Geometry III  3.1; 3 cr.
Multivariable functions, partial derivatives, cylindrical and spherical coordinates, multiple integrals, sequences and series, and integration in vector fields. *Prerequisite: MATH 201. Each semester.*

**MATH 202**  Differential Equations  3.1; 3 cr.
Surface integrals, Stokes theorem, divergence theorem; first-order differential equations, linear differential equations, series solutions, Bessel’s and Legendre’s functions, Laplace transform, and systems. *Prerequisite: MATH 201. Each semester.*

**MATH 203**  Mathematics for Social Sciences I  3.0; 3 cr.
Polynomials, factoring, first- and second-degree equations, inequalities, absolute value, straight lines, Gaussian elimination, functions, graphs, exponential and logarithmic functions, and differentiation. *Not open to students with prior credit in MATH 101 (or its equivalent) or Math 201. Each semester.*

**MATH 204**  Mathematics for Social Sciences II  3.0; 3 cr.
Matrix operations, inverses, determinants, set operations, permutations, combinations, probability, rate of change, techniques of integration, differential equations, graphs of multivariate functions, partial derivatives, and optimization. *Prerequisite: MATH 101 or MATH 203. Each semester.*

**MATH 210**  Introduction to Analysis  3.0; 3 cr.
The real numbers, completeness, sequences, some basic topology of the real line, compact sets, Heine-Borel theorem, continuous functions, intermediate value theorem, uniform continuity, extreme values, differentiation, mean-value theorem, Taylor’s theorem, and integration, sequences and series of functions. *Prerequisite: MATH 201. Annually.*

**MATH 211**  Discrete Structures  3.1; 3 cr.
Logical reasoning, sets, relations and functions; mathematical induction, counting, and simple finite probability theory; analysis of algorithms, complexity; recurrence relations and difference equations; truth tables and switching circuits; graphs and trees; strings and languages. This course is equivalent to CMPS 211. *Annually.*
MATH 212  Introductory Partial Differential Equations 3.0, 3 cr.
Partial differential equations as mathematical models in science, Fourier series, Fourier inversion, Gibbs phenomenon, applications of Fourier series to partial differential equations (heat equation, Laplace equation, wave equation), Sturm-Liouville Systems, Fourier and Laplace transforms and applications to partial differential equations, pointwise and uniform convergence of sequences and series of functions. Prerequisites: MATH 201, MATH 202. For non-Math majors. Students cannot receive credit for both Math 212 and 224. Each semester.

MATH 213  Higher Geometry 3.0; 3 cr.
Topics chosen from isometries of Euclidean space, inversion, elements of differential geometry, the Frenet frame, curvature, torsion, the pseudo-sphere, hyperbolic geometry, and affine and projective geometry. Biennially.

MATH 214  Topology I 3.0; 3 cr.

MATH 216  Topology II 3.0; 3 cr.
A senior level course covering more advanced topics in topology. Prerequisite: Consent of instructor. Biennially.

MATH 218  Elementary Linear Algebra with Applications 3.0; 3 cr.
An introduction to linear algebra at a less theoretical level than MATH 219. Systems of linear equations and Gaussian elimination, vectors in R^n, matrices, determinants, vector spaces, subspaces and dimension, orthogonal projection and least-squares approximation, eigenvalues, eigenvectors, and selected applications. Students cannot receive credit for both MATH 219 and MATH 218. Annually.

MATH 219  Linear Algebra I 3.0; 3 cr.
A rigorous introduction to linear algebra, with emphasis on proof and conceptual reasoning. Vector spaces, linear transformations and their matrix representation, linear independence, bases and dimension, rank-nullity, systems of linear equations, brief discussion of inner products, projections, orthonormal bases, change of basis, determinants, eigenvalues, eigenvectors, and spectral theorem. Students can not receive credit for both MATH 219 and MATH 218. Annually.

MATH 220  Linear Algebra II 3.0; 3 cr.
A deeper study of determinants, inner product spaces, and eigenvalue theory. Adjoints and the spectral theorem, primary decomposition, quotient spaces, diagonalization, triangularization, rational and Jordan forms, connection with modules over a PID, dual spaces, bilinear forms, and tensors. Prerequisite: MATH 241 or consent of instructor. Biennially.

MATH 223  Advanced Calculus 3.0; 3 cr.
Metric spaces, normed vector spaces, the derivative as a linear transformation, chain rule, vector versions of mean-value theorem, Taylor’s formula, inverse and implicit function theorems, divergence, curl, differential forms, Stokes’s theorem, and notions of differential geometry. Prerequisite: MATH 210 or MATH 224, and MATH 218 or MATH 219. Biennially.

MATH 224  Fourier Analysis and Applications 3.0; 3 cr.
Uniform and absolute convergence of infinite series and integrals, Laplace’s method and Stirling’s formula, Sturm-Liouville systems, Gram-Schmidt orthogonalization, orthogonal polynomials, Fourier series, Fourier integrals, Parseval and Plancherel theorems, and some partial differential equations. Prerequisite: MATH 201 and MATH 210. Annually. Students cannot receive credit for both Math 212 and 224.
MATH 225  Wavelets and Applications  3.0; 3 cr.

MATH 227  Introduction to Complex Analysis  3.0; 3 cr.
Complex numbers, analytic functions, integration in the complex plane, Cauchy’s integral theorem, Taylor series, Laurent series, singularities, residues, and contour integration. Prerequisites: MATH 201 and consent of instructor. Annually.

MATH 233  Advanced Probability and Random Variables  3.0; 3 cr.
Same description as STAT 233. Annually.

MATH 234  Introduction to Statistical Inference  3.0; 3 cr.
Same description as STAT 234. Annually.

MATH 238  Applied Probability Models  3.0; 3 cr.
Same description as STAT 238. Annually.

MATH 241  Introduction to Abstract Algebra  3.0; 3 cr.
Groups, subgroups, homomorphisms, normal subgroups and quotient groups, permutation groups, orbits and stabilizers, statement of Sylow theorems, rings, ideals, homomorphisms and quotient fields, and Euclidean and principal ideal domains. Prerequisite: MATH 219 or MATH 218 with a good understanding of proof, or consent of instructor. Annually.

MATH 242  Topics in Algebra  3.0; 3 cr.
Topics chosen among: fields and Galois theory, group theory, ring theory, modules over a PID, and other topics as determined by the instructor. Prerequisite: MATH 241. Biennially.

MATH 251  Numerical Computing  3.1; 3 cr.
Techniques of numerical analysis: number representations and round-off errors, root finding, approximation of functions, integration, solving initial value problems, Monte-Carlo methods. Implementations and analysis of the algorithms are stressed. Projects using MATLAB or a similar tool are assigned. Prerequisites: CMPS 200 and MATH 201. This course is equivalent to CMPS 251. Annually.

MATH 261  Number Theory  3.0; 3 cr.
Prime factorization, the Euclidean algorithm, congruences, quadratic reciprocity, some Diophantine equations, binary quadratic forms, and continued fractions. Prerequisite: MATH 219 or consent of instructor. Annually.

MATH 271  Set Theory  3.0; 3 cr.
Operations on sets and families of sets, ordered sets, transfinite induction, axiom of choice and equivalent forms, and ordinal and cardinal numbers. Biennially.

MATH 281  Numerical Linear Algebra  3.0; 3 cr.
Equivalent to CMPS 281. Biennially.

MATH 293/294  Senior Tutorial Courses  3.0; 3 cr.
Prerequisite: Senior standing.

Statistics

STAT 201  Elementary Statistics for the Social Sciences  3.0; 3 cr.
(Formerly MATH 207) Data organization and frequency distributions; measures of central tendency and dispersion; probability and random variables; binomial and normal distributions; correlation, regression, estimation, and hypothesis testing. Open only to arts students whose mathematical preparation does not allow them to take STAT 210. Students can get credit for only one of STAT 201, STAT 210, STAT 230, EDUC 227, or ECON 213. Each semester.

STAT 210  Elementary Statistics for the Sciences  3.0; 3 cr.
(Formerly MATH 208) Populations, samples, and sampling error; types of data, frequency distributions, and graphical displays of data; empirical definition of probability and probability distributions; conditional probability, independence, Bayes’ rule, and counting rules; discrete and continuous distributions, random variables, binomial, normal, and t distributions; point and interval estimation and hypothesis testing; linear regression and correlation. Computer packages may be used to illustrate methods. Students can get credit for only one of STAT 201, STAT 210, STAT 230, EDUC 227, or ECON 213. Each semester.

STAT 230  Introduction to Probability and Random Variables  3.0; 3 cr.
Display of data, properties of probability, methods of enumeration, conditional probability, and independent events; discrete and continuous univariate distributions, generating functions, independent random variables, and the central limit theorem. Prerequisite: MATH 201. Students can get credit for only one of STAT 201, STAT 210, STAT 230, STAT 233, EDUC 227, or ECON 213. Each semester.

STAT 233  Advanced Probability and Random Variables  3.0; 3 cr.
Axiomatic definition of probability, random variables, univariate and multivariate p.d.f. and c.d.f.; expectation; moment generating function; conditional distribution; families of discrete and continuous random variables; distribution of functions of random variables; stochastic convergence and convergence of distribution functions; the law of large numbers and the central limit theorem. Prerequisites: MATH 201. Annually.

STAT 234  Introduction to Statistical Inference  3.0; 3 cr.
Sampling distribution; point and interval estimation; Neuman-Pearson theory of hypothesis testing; likelihood ratio test; sequential analysis; elementary decision theory. Prerequisite: STAT 233 or consent of instructor. Annually.

STAT 235  Applied Regression Analysis  3.0; 3 cr.
Straight line regression, multiple regression, analysis of variance and analysis of covariance, multiple and partial correlation; hypothesis testing; confounding, interaction and regression diagnostics; discriminant and factor analysis. Prerequisite: STAT 234. Annually.

STAT 236  Sampling Techniques  3.0; 3 cr.
Simple random, systematic, stratified, cluster, and two-stage sampling; estimation of parameters and properties of estimates; ratio and regression estimates; problem of non-response. Prerequisite: STAT 234. Annually.

STAT 237  Applied Nonparametric Methods  3.0; 3 cr.
Order statistics; sign test, Wilcoxon signed-rank test, and Mann-Whitney test; run test and test for randomness; goodness of fit tests; efficiency. Prerequisite: STAT 234 or consent of instructor. Annually.
STAT 238  Applied Probability Models  3.0; 3 cr.
Conditional probability and expectation; discrete and continuous time Markov chains; Chapman-Kolmogorov difference and differential equations; limiting probabilities; branching, Poisson, and birth and death processes; distribution of arrival times; queuing theory. Prerequisite: STAT 233 or consent of instructor. Annually.
