Faculty of Engineering and Architecture (FEA)
Faculty of Engineering and Architecture (FEA)

Officers of the Faculty

- Peter F. Dorman: President of the University
- Ahmad Dallal: Provost, ex-officio
- Makram Suidan: Dean
- Fadl Moukalled: Associate Dean
- Moueen Salameh: Registrar, ex-officio
- Salim Kanaan: Director of Admissions, ex-officio
- Lokman Meho: University Librarian, ex-officio

Faculty Administrative Support

- Ghada Kamar Najm: Executive Officer
- Alia Kazma Serhal: Student Services Officer
- Lara Touma: Financial Officer

Historical Background

As early as 1913 the University recognized the need for engineering education and training in the Middle East, and courses in this field were offered in the School of Arts and Sciences. By 1944 sufficient additional courses had been added to permit the granting of the degree of Bachelor of Science in Civil Engineering. The last class in this program graduated in June 1954. In 1951 a separate School of Engineering was established and curricula were initiated in civil engineering, mechanical engineering, electrical engineering, and architectural engineering. The years from 1951 to 1954 were a transitional period of continuous development toward the new curricula, established in 1954. In 1963 a program leading to the degree of Bachelor of Architecture was introduced, replacing the bachelor of architectural engineering program, the last class of which graduated in June 1966. In that year the school was renamed the Faculty of Engineering and Architecture. Since then curricula have been under constant review with changes introduced as necessary to keep pace with modern technology, to conform to sound developments in engineering and architecture education, and to meet the evolving needs of the region. In 1986 a new undergraduate major in computer and communications engineering was added within the Department of Electrical and Computer Engineering. In 1992 a new major in graphic design was added within the Department of Architecture and Design. In 2006 the name of the degree was changed to Bachelor of Fine Arts in Graphic Design. In 2006 the name of the Electrical Engineering degree was changed to Electrical and Computer Engineering. In 2009 two new programs offering BS and BE degrees were added to the FEA. A Construction Engineering Program in the CEE department and a Chemical Engineering Program currently housed in the Mechanical Engineering Department.
Accreditation
The American University of Beirut, Bachelor of Engineering (BE) programs in civil engineering, computer and communications engineering, electrical and computer engineering, and mechanical engineering have been accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012. This is one of the most respected and internationally renowned accreditation organizations in the USA. ABET accreditation demonstrates a program’s commitment to providing its students with a quality education.

Mission
The Faculty of Engineering and Architecture (FEA) at the American University of Beirut is a leading professional school in the Middle East. The FEA offers educational programs of the highest standards, advances knowledge through research and scholarly creative work of its faculty and students, and provides services to the community at large, while addressing the needs of Lebanon and the region. The FEA undergoes continuous improvement to maintain a challenging and intellectually stimulating environment, and prepares its students to be lifelong learners, innovators, and professionals capable of being leaders in their chosen careers, committed to personal integrity, and civic responsibility.

Undergraduate Programs
The Faculty of Engineering and Architecture offers programs of study leading to the degrees of Bachelor of Architecture (BArch), Bachelor of Fine Arts in Graphic Design (BFA), and the degree of Bachelor of Engineering (BE), with majors in civil engineering, computer and communications engineering, electrical and computer engineering, mechanical engineering, and chemical engineering. The curriculum of the BArch degree extends over 14 terms (ten 16-week semesters and four eight-week summer terms), totaling 192 weeks. Although the program is completed in five calendar years, it is equivalent to a program of six academic years that does not include summers. The curriculum of the BE degree and that of the BFA degree is each divided into 11 terms (eight 16-week semesters and three eight-week summer terms), totaling 152 weeks. This duration is equivalent to five academic years, without summers, but the program is completed in four calendar years. There is a short break after each term and a one-month vacation between summer and fall terms. The Faculty also offers a Bachelor of Science (BS) degree in Construction Engineering and a Bachelor of Science (BS) degree in Chemical Engineering. The curriculum of both BS degree programs require the completion of 110 credit hours, after the freshman year, of course work over three years, including two summer terms.

The Faculty reserves the right to make changes in the curriculum, course content, and regulations as it deems appropriate, and without prior notice.

Admissions
Admission to First Year
Admission is by the selection of a limited number of the most promising, eligible applicants. All candidates for admission to the Faculty of Engineering and Architecture must have completed the pre-professional educational requirements of the candidate’s country and the
approved freshman program in the Faculty of Arts and Sciences of this University as described in this catalogue, or a program recognized as equivalent. The certificates, recognized for admission to the first year in the Faculty of Engineering and Architecture, are listed under Secondary Certificates in the section on Admissions in this catalogue. Holders of the technical baccalaureate (BT) are eligible for admission only to the same major as that of the BT.

More specifically, to be eligible for admission to the first year in the Faculty of Engineering and Architecture, a candidate must

- Demonstrate an acceptable level of proficiency in English, as specified under Admissions in this catalogue
- Sit for the required SAT I tests as specified in the relevant section in Admissions in this catalogue
- Satisfy the Faculty of Engineering and Architecture requirements on character recommendation, as well as academic grounds

Students admitted to the first year are required to take all the major engineering, architecture, or graphic design courses specified in their respective programs.

The Department of Architecture and Design limits choices to either Architecture or Graphic Design and not to both. Students accepted in Graphic Design cannot transfer to Architecture and vice versa.

**Admission of Transfer Students**

Students attending recognized institutions of higher learning, including AUB, may apply for transfer to any of the engineering, architecture, or graphic design majors in the FEA. These students are eligible for consideration for admission to any of Terms I through VI (Term VIII for architecture) depending on availability of places and subject to the following conditions. Students will not be admitted to the architecture or graphic design programs in the middle of the academic year. Students must

- Have completed the equivalent of the sophomore class at the college or university from which they are transferring
- Have attained a minimum cumulative average of 2.7 out of 4.0 (75 out of 100 for AUB students)
- Have taken at least 12 credits of math and basic science courses at the sophomore level or higher and attained a total average in these courses of at least 3.0 out of 4.0 (77 out of 100 for AUB students) This applies to engineering and architecture majors only
- Have satisfied the university English requirements for admission
- Students from outside AUB applying for transfer to the architecture or graphic design majors are required to submit portfolios of their work; students from within AUB applying for transfer to the architecture or graphic design majors are encouraged to submit portfolios of their work.

Applications of transfer students are evaluated and approved by the departments and the Admissions Committee of the Faculty. The term in which the student is placed, and the complete program of study in the major in which s/he is admitted, are determined by the department concerned depending on the number of credits completed at the institution from which the student is transferring.

**Non-degree Students**

Refer to page 43 in this catalogue.
Students working for Dual Degree

Students may, upon approval of the Faculty concerned, complete the requirements for a second degree while registered in another Faculty at AUB (or in the same faculty if there are two different degree structures). In such a case, a student will be granted two degrees at the same time of graduation. If tuition differs, students will pay the higher of the tuitions. Information about deadlines and applications are available on the following link: www.aub.edu.lb/registrar/Documents/pdfdoc/dualdegree.pdf

Students working for a Double Major

Students may, upon the approval of the faculty, earn more than one major in the same degree structure within the faculty of engineering (both BS or BE degrees) which means that the student earns one degree with a double major. In such case, one diploma will be issued with both majors indicated. Students enrolled in a double major must satisfy requirements of both majors and must satisfy at least 15 credit hours over and above the requirements of both majors. Information about deadlines and applications are available on the following link: www.aub.edu.lb/registrar/Documents/pdfdoc/doublemajor-application.pdf

Residence Requirements

Students of the Faculty of Engineering and Architecture must meet the following minimum residence requirements:

- **Engineering or Graphic Design Majors:** A student must register in residence at the Faculty of Engineering and Architecture for the last four regular semesters and should complete at least 50 credits during this period.

- **Architecture Major:** A student must register in residence at the Faculty of Engineering and Architecture for the last five regular semesters and should complete at least 65 credits during this period.

Academic Rules and Regulations

For information on Categories of Students, Correct Use of Language, Grading System, Graduation with Distinction and High Distinction, and Placement on the Dean’s Honor List, see pages 51–70 in this catalogue.

General Education Program Requirements

Students in the CCE, ECE and ME departments are expected to satisfy the following distribution requirements of humanities/social sciences courses:

- Two English courses, one of them English 206 (6 credits)
- One Arabic Communications Skills course as determined by the Arabic Placement Test (3 credits)
- One course on ethics (3 credit humanity course)
- Three humanities courses (9 credits)
- Two social sciences courses (6 credits)

FEA students must select humanities/social science elective courses from the approved GE program course list on the Registrar’s homepage.
Graduation Requirements
To be eligible for graduation with the bachelor’s degree, a student must have passed all the required courses and the approved experience
• attained a minimum cumulative course average of 70
• attained a cumulative average of 70 or more in major courses as specified by the department
• met the residence requirements
• satisfied the faculty as to the adequacy of the student’s professional development and conduct

Class Status
The class status of students is as follows:

<table>
<thead>
<tr>
<th>Year</th>
<th>Terms</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year</td>
<td>Terms I and II</td>
</tr>
<tr>
<td>Second Year</td>
<td>Terms III, IV, and V</td>
</tr>
<tr>
<td>Third Year</td>
<td>Terms VI, VII, and VIII</td>
</tr>
<tr>
<td>Fourth Year</td>
<td>Terms IX, X, and XI</td>
</tr>
<tr>
<td>Fifth Year (architecture)</td>
<td>Terms XII, XIII, and XIV</td>
</tr>
</tbody>
</table>

A student’s status is changed to that of a higher year if his/her cumulative number of failed, withdrawn or unregistered credits from the regular credit hour requirements does not exceed seven.

Change of Major within the Faculty
All changes of major are subject to approval by the department to which the change is requested. The receiving departments will determine the new study plans for students accepted to a new major.

Minor in Applied Energy
The minor in applied energy is open to all FEA students who are interested in the energy domain and in renewable energy applications. Students seeking professional careers that will focus on energy, the environment, sustainable applications in buildings, and energy systems may find this minor attractive. The minor in applied energy is offered by the Faculty of Engineering and Architecture rather than by an individual department.

Students who have completed at least 60 credits at the sophomore level and higher, and who have a cumulative average of 70 or more, may apply by completing a minor application form available in the Dean's Office. The minor will be indicated on the transcript of the student who completes all the requirements described below. A minimum grade of 70 is required for a course to count toward the fulfillment of the minor.
Applied Energy Minor Program Structure

The applied energy minor has two components. The first is a core of courses that provides a foundation for the understanding of energy science and technology. The second component is a customized series of electives and labs, selected by each student in close consultation with a special faculty advisor for the applied energy minor. A student wishing to complete the minor is required to complete a minimum of 20 credits: 9 credits from the list of core courses, and 11 credits from the list of elective courses.

Required Core Courses (9 credits)

The core courses include courses from three domains related to energy studies: one course in fundamental energy science, one course in energy technologies, and one course in energy management and economy as follows:

**Fundamental Energy Science Course**

MECH 310  Thermodynamics I  3 cr.
or CIVE 340  Fluid Mechanics and Laboratory  3 cr.
or CHEM 217  Thermodynamics and Chemical Dynamics  3 cr.

**Energy Technologies Course**

EECE 675  Renewable Energy Systems  3 cr.

**Energy Management and Economy Course**

ECON 333  Energy Economics and Policy  3 cr.

Elective Courses (Minimum of 11 credits)

Elective courses are selected from two lists. List A includes technical courses from chemical, mechanical, and electrical engineering majors at the undergraduate and master's levels. List B includes courses in management, sciences, and the social sciences. The student must take a minimum of five credits from list A and a minimum of three credits from List B.

**List A: Energy in Engineering Context**

Total Credits 20-21 20-21 20-21 20-21

Minor in Biomedical Engineering

The minor in Biomedical Engineering is open to all AUB students. Students who have completed at least 60 credits at the sophomore level and higher, and who have a cumulative average of 70 or more, may apply by completing a minor application form available in the ECE department. The minor will be indicated on the transcript of the student who completes all the requirements described below, and who obtains an average in the minor courses of 70 or more.

The minor requirements are divided into a set of core courses and a set of elective courses.

Core Courses

For engineering students:
- EECE 401 (1 cr.)
- BIOL 201 (4 cr.)
- BIOL 202 or PHYL 246 (4 cr.)
- One core course (3 cr.) chosen from EECE 601, EECE 603, or MECH 633
- One elective course from list A below (3 cr.)
- One elective course from list A, B, or C below (3 cr.)

Minimum number of credits: 18

For biology students:
- EECE 401 (1 cr.)
- BIOL 201 (4 cr.)
- BIOL 202 (4 cr.)
- PHYS 228 (3 cr.) and PHYS 228L (1 cr.) or equivalent, and EECE 601 (3 cr.) or CIVE 210 (3 cr.) or equivalent, and MECH 634 (3 cr.)
- One elective course from list A or B below (3 cr.)

Minimum number of credits: 19

For all other students:
- EECE 401 (1 cr.)
- BIOL 201 (4 cr.)
- BIOL 202 or PHYL 246 (4 cr.)
- PHYS 228 (3 cr.) and PHYS 228L (1 cr.) or equivalent, and EECE 601 (3 cr.) or (CIVE 210 (3 cr.) or equivalent, and MECH 634 (3 cr.)
- One elective course from list A, B, or C below (3 cr.)

Minimum number of credits: 19
Elective Courses

List A: EECE 601, EECE 602, EECE 603 (unless the student takes EECE 694, in which case either EECE 694 or 603 counts toward the minor), EECE 604, EECE 605, MECH 633, MECH 634

List B: MECH 532, MECH 606, MECH 607, MECH 624, MECH 631, MECH 641/EECE 661, EECE 693, EECE 694 (unless the student takes EECE 603, in which case either 694 or 603 counts toward the minor)

List C: BIOL 202, BIOL 223, BIOL 225, BIOL 244, BIOL 263, BIOL 268, PHYL 202, PHYL 246

Minor in Chemical Engineering

The minor in chemical engineering, currently offered in the Mechanical Engineering Department, is open to all engineering students in majors other than chemical engineering.

Minor Program Requirements (21 credits)

Student taking the minor are required to complete 21 credits of course work: 15 credits of core courses, and six credits of elective courses from the list given below.

Required Core Courses (15 credits)

- MECH 310 Thermodynamics I 3 cr.
- CHEN 311/MECH 314 Introduction to Fluids Engineering 3 cr.
- CHEN 312 Separation Processes 3 cr.
- CHEN 411 Heat and Mass Transfer Operations 3 cr.
- CHEN 417 Reactor Engineering and Reactor Design 3 cr.

Elective Courses (6 credits) selected from the following courses

- CHEN 314 Chemical Engineering Thermodynamics 3 cr.
- CHEN 451 Process Instrumentation and Measurements 3 cr.
- CHEN 470 Chemical Process Design 3 cr.
- CHEN 480 Safety and Loss Prevention 3 cr.
- CHEN 515 Mechanical Unit Operations 3 cr.
- CHEN 531 Principles of Corrosion 3 cr.
- CHEN 570 Process Synthesis and Optimization 3 cr.
- CHEN 571 Chemical Product Design 3 cr.
- CHEN 612 Desalination 3 cr.
- CHEN 672 Polymer Science 3 cr.
- CHEN 673 Engineering of Drug Delivery Systems 3 cr.
Minor in Engineering Management

The Engineering Management Program offers a minor in engineering management that can be pursued by undergraduate engineering and architecture students, as well as by students from related majors, starting as early as the fall semester of their third year of enrollment. Only students who have a cumulative average of 70 or more are eligible to apply for the minor. To satisfy the requirements of the minor, a student must earn 18 credits of course work from the engineering management course offerings.

- At least nine of the total requirement of 18 credits must be fulfilled from the six undergraduate courses offered by the program, which must include ENMG 400: Engineering Economy. These nine credits must also include either ENMG 500: Engineering Management I, or ENMG 501: Engineering Management II.
- The other nine credits can be satisfied by taking courses either from the list of undergraduate courses or from the elective graduate courses offered by the program.

A minimum grade of 70 is required for a course to count toward the fulfillment of a minor in engineering management. Additionally, a cumulative average of 75 or above in all the minor courses is required.
