Booz Allen Hamilton is the oldest and among the most prestigious global management consulting firms in the world. This year we celebrate our 100-year anniversary of helping the largest and most influential institutions sustain growth, modernize and build resilience – from coining the term "management consulting", to supporting the turn-around of Chrysler Motors, helping design the Hubble Telescope and restructuring the public services of the Abu Dhabi Government.

Booz Allen Hamilton is also the longest serving management consulting firm in the Middle East – active in the region since the 1970’s. In 1993, we were first to open offices in the region starting in Abu Dhabi and soon thereafter in Beirut, Riyadh, Dubai, Cairo and Doha.

Today, Booz Allen Hamilton is a leading provider of management and technology consulting services serving clients in aerospace and defense, financial services, ICT and telecommunications, healthcare, energy and utilities, transport and logistics and the public sector. We offer our clients deep industry and functional knowledge spanning industry-specific strategy, organization and operations, engineering and production, infrastructure technology and cyber security, data analytics, and digital innovation. This depth allows us to design, define and develop the essential building blocks to help clients address complex and pressing challenges from vision and strategy through implementation to operations.

We invite sharp, talented and intellectually curious minds to join us on our journey. But finding the right employer to launch a successful career that enables you to have significant impact does take careful consideration. Come learn more during our presentation.
