**Job Title:** Senior Developer

**Application Deadline:** N/A

**Reference Number:** 071013-15

**Company Description**

**TYPE:** X Local ☐ Regional ☐ Multinational

**INDUSTRIAL SECTOR:** RFID Solution

**BRIEF FIRM PROFILE/DESCRIPTION:** We design and develop scalable and customized RFID infrastructure solutions. We help partners all over the world realize the full potential of RFID systems by maximizing Return On Investment and reducing Total Cost of Ownership. The Envoy, our RFID Engine, is at the core of many demanding RFID deployments worldwide.

**Job Description**

**BRIEF JOB DESCRIPTION:**

As Software developer the developer will be responsible to design, build, test and document multiple software components of the company’s products. The developer should have a strong fundamental grasp of application development tools, testing procedures, and systems development life cycle processes. They should be able to implement and maintain complete RFID solutions while delivering fast quality support to clients.

The company will provide the developer intensive training on RFID from the basic technology overview to all related applications and solutions we offer. We need a professional who can quickly become productive as part of a fast-moving technology and enhance Active Identity’s delivery and support services.
