Scope and Content

The Collection includes Dr. Talhouk's biographical information, correspondence with scientists, research papers, books, negatives, and photos. It reflects the life, research, and work of a prominent entomologist, his research and national and international connection with scientists from around the world.

Arrangement

The Collection is arranged in four series:

- Series I:** Biography & Honoring
- Series II:** Correspondence
- Series III:** Research & publications
- Series IV:** Photos, Negatives and Albums

Biographical Sketch

Emeritus professor and a world reference in the field of entomology, Dr. Abdul Monim S. Talhouk was born in 1913 in Fayoum, Egypt. After he graduated from school, he joined the American University of Beirut as a freshman, then left in 1930 to work for a year at the Near East Foundation in the Beqaa. Later, he took over his father's orchard in the mountains of Lebanon where he discovered his great interest in agriculture and insects, eventually turning into his ultimate passion.

Thirteen years later, he returned to AUB, and graduated with a BS in Biology in 1948, and with a Masters in 1955. He received his doctorate from the University of Munich, Germany, in 1960.

Professor Abdul Monim Talhouk was an internationally known entomologist discovered some 400 unidentified insects in Saudi Arabia, in addition to 150 species of insects and mites new to science in Lebanon and Syria. In recognition of his numerous discoveries, twenty-five species were named after Talhouk. (e.g., *Synopseas Talhouki* and *Nigilgia Talhouki*).

Professor Talhouk engaged in various research projects on entomophagous insects, the chemical control of insect pests, biological and ecological studies of pests, and virus transmitters and the first to discover the agent of the infectious disease of the almond trees and the means to control it.

Dr. Talhouk published seventy-five articles and four books on insects. He donated his rare butterflies and insects' collection, collected between 1935 and 2002, to the Natural History Museum of the American University of Beirut (Great Scholar-Teachers p: 73-74)

Dr. Talhouk was awarded the first prize of science by the Lebanese Society of the Friends of the Book both in 1963 and 1971 and the AUB Penrose Award for Great Scholar – Teachers in 2000.

After retirement in 1979, Professor Talhouk continued teaching on a voluntary basis till 1990 but continued his research until his death in 2004.

بستان نخيل روعيت فيه الأبعاد بين الأشجار ظهرت عليه علامات العافية

0025 *3-4

الدبس او المن يظهر بوضوح على ورقة نبات العشار (الرياض في يونيو ١٩٨١ م.)

0028

نوعان من "ابي العيد" ودودة أحدهما تفترس الدبس باعداد هائلة. وما يظهر كقشور مبيضه هو بقايا الفريسة من الدبس التي التهمته. (الخرج في يناير ١٩٨٢ م.)

0025*1-2

منظر لاصابة بالبق الدقيقي العادي على أوراق التين (الخرج اكتوبر ١٩٨٠ م.)

0018-0004

تأثير طريقة تربية شجيرات العنب على مدى انتشار الاصابة بالبق الدقيقي حيث أن الظل والرطوبة العالية يمنعان موت العديد من يرقاتها الصغيرة.

0022-0003

التفاف الاوراق وسقوط بعضها نتيجة لتسمم انسجتها بالعاب السام لحشرة بسلا الحمضيات (هدى الشام مارس ١٩٨٠ م.)

0022-0001

بستان حمضيات مصاب بأفة بسلا الحمضيات جرت مكافحتها بالمبيدات الجهازية بالإضافة الى الاعتناء بالتسميد والري والتقليم. المهندس احمد عرفه يدل على مدى التحسن خلال ٢٧ شهرا بعد الاستعاضة بمبيدات جهازية لا تقتل المفترسات والمتطفلات التي تفترس حشرة بسلا الحمضيات (وادي خليص مايو ١٩٨٠ م.)

0024-0001

بستان برتقال اضعفته آفة بسلا الحمضيات نتيجة لاستعمال المبيدات الخاطئة التي قضت على جميع الاعداء الطبيعية لهذه الآفة دون القضاء التام على الآفة نفسها (وادي خليص ابريل ١٩٧٧ م).
