

SHARP

Scholars in HeAlth
Research Program

The 7 weeks, June-July, summer certificate program

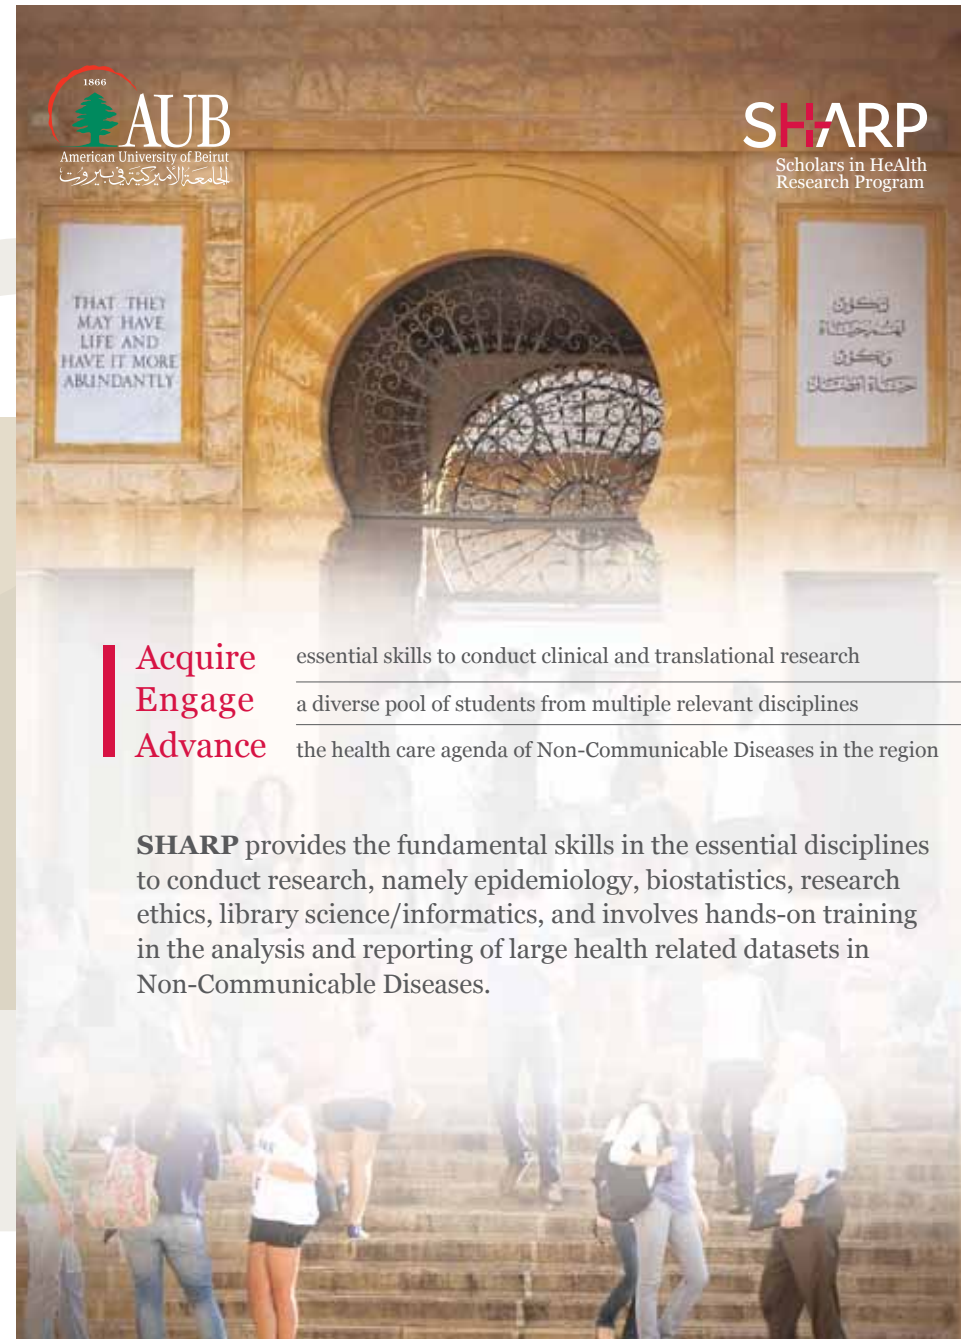

- Offers in-depth skills in quantitative research methods (12 credits)
- Is taught by pioneering faculty teaching research conduct at AUB
- Allows the option to continue in established master degrees at various faculties at AUB, or the novel 40 credits **SHARP** MS degree

Acquire Engage Advance

essential skills to conduct clinical and translational research

a diverse pool of students from multiple relevant disciplines

the health care agenda of Non-Communicable Diseases in the region

SHARP provides the fundamental skills in the essential disciplines to conduct research, namely epidemiology, biostatistics, research ethics, library science/informatics, and involves hands-on training in the analysis and reporting of large health related datasets in Non-Communicable Diseases.

Landmark Quotations

- I can now engage in a successful career.

- Paving the road for career in academia.

- I leave SHARP as a different person with a different perspective on research. I am proud to have attended this program and I acknowledge this will be a landmark in my professional research career.

- I think SHARP gave me the essential and necessary basis to start an academic career. All I did before SHARP was bits and pieces. SHARP was the foundation to continue from.

- I appreciate the experience overall. I feel lucky to have been accepted in this program. I will never read an article the same way I did before! I'm thankful for this opportunity.

- It built the foundation of my academic career.

- It's one step on the way to become an academician.

- It is the perfect launching of an academic career. I now consider doing a Master's degree and feel more comfortable and excited about going into academics.

- I have acquired an online new set of skills due to SHARP.

The SHARP program has put me on the right track to becoming a clinical researcher

I now understand the meaning of Acquire, Engage, Advance

- It's a great start. Despite the fact that it was exhausting, I can't but see its worth.

- It means I understand research, I know each and every step in designing, conducting and orienting a study. I can read critically and take the best evidence for patient care.

- It enriched my knowledge about research analysis and design.

- It was a wonderful experience. I learnt more than I expected to learn and after SHARP I am a different person in terms of research.

- A great achievement, big challenge to learn, process and deliver the output of totally new concepts time.

- It's a step forward to advance in my career, I'm much more confident now about what I know in research, my life now has 2 main chapters (life before SHARP and life after SHARP).

**ONCE IN A LIFETIME EXPERIENCE!!
Big Big Big Thank you**
