EXECUTIVE SUMMARY

Between the academic years 2000-2001 to 2002-2003, the Faculty of Health Sciences has obtained 90% of its sponsored research grants from international and regional sources (Table 1). Over the three academic years, the percentage of the total amount of funding has increased by 16% for international and regional organizations, decreased by 15% for local agencies, while the percentage of University Review Board funding has remained comparatively stable.

Table 1: Summary of Funding by Source, 2000-2003

Funding Source	Amount
International/Regional	4,040,127
Local Agencies	396,018
URB	69,649

The research output of the Faculty of Health Sciences during the academic years 2000-2001 to 2002-2003 is itemized in Table 2. Between the three academic years, publications in refereed journals has increased by 118.5%, and the percentage of refereed journal articles as proportion of the total number of publications has risen by 15%. Oral and poster presentations have increased by 90% during the same time frame, while other publications, such as graduate theses, have increased by over 300%.

Table 2: Summary of Publications, 2000-2003

Type of Publication	Number
Refereed journal Publications	123
Non refereed Journal Publications	1
Books	4
Edited books	2
Research reports	19
Oral or poster presentations	89
Others (e.g. graduate theses)	29

With respect to co-operative faculty research activities, between the academic years 2000-2001 and 2002-2003, co-authorship within one department at FHS has increased by 3.4%, co-authorship across the five departments has increased by 5.3% and co-authorship with outside institutions has decreased by 18.1%. The proportion of publications with FHS faculty as lead author has increased by 16.3%.

INTRODUCTION

The Faculty of Health Sciences (FHS) Research Committee is pleased to present the first Research Report for FHS, covering the past three academic years, 2000-2001 to 2002-2003. This is a regular report to be published by the RC (Research Committee) on an annual basis. The report contains numeric data on FHS research activities and outputs, with a focus on sponsored research and journal publications. The data may be used to monitor progress towards achieving the research objectives listed below:

1. Increase the quality and quantity of research publications
2. Sustain collaborative and interdisciplinary research
3. Sustain regional scholarship
4. Maintain the amount of sponsored research

Currently, FHS consists of five departments: Environmental Health, Epidemiology and Population Health, Health Behavior and Education, Health Management and Policy, and Medical Laboratory Technology. The report includes measurable outcomes on the research objectives for FHS as a whole and by department. With respect to research output, the quantity and type, but not the quality, of publications are provided. Owing to the diverse nature of its disciplines, FHS does not have its own quality ranking of journals. A partial list of the journals in which FHS faculty have published during the past three academic years is included as Appendix A. Appendix A also includes the most recent Impact Factor and ranking of journals within the disciplines as defined by the Institute for Scientific Information (ISI).

During the past year, FHS RC prepared written procedures for University Research Board (URB) proposal evaluations and launched its own website. A copy of the RC guidelines for evaluating URB proposals and the evaluation form is included in Appendix B.

The RC would like to acknowledge the contributions of Mrs. Ruba Ismail-Hamad and Ms. Maya Obeid in preparing this report.

RESEARCH GRANTS

The FHS has been successful in forming multi-investigator, multi-disciplinary research teams that attracted substantial extramural funding. The overall amount of funds increased from 1.1 million to 1.7 million between the academic years 2000-2001 and 2002-2003, amounting to 33% increase. During this period, the international and regional sponsorship of faculty research has increased whereas dependence on local sources has decreased. A summary of the amount of funds per year is displayed in Table 3. Appendices C, D and E show an itemized list by year of faculty research grants.

Table 3: Faculty Research Grants, 2000-2003.

Source	2000-2001		2001-2002		2002-2003	
	Amount	%	Amount	%	Amount	%
Sponsored Research						
International Agencies	911,750	80.8	1,488,878	88.4	1,639,499	96.8
Local Agencies	191,730	17.0	175,662	10.4	28,626	1.7
URB	24,400	2.2	20,000	1.2	25,249	1.5
Total	1,127,880	100.0	1,684,540	100.0	1,693,374	100.0

PUBLICATIONS

Table 4 shows a detailed distribution of the number of different publications, as well as dissemination of research output in conferences, by academic year whereas Tables 5 through 7 show a distribution by year and department within FHS. The total number of publications of all types increased by almost 95% between the academic years 2000-2001 and 2002-2003. The items published in refereed journals increased by 119% over the three academic years. Presentations of research findings at international conferences increased by 90% over the same period. These figures reflect clear increases in both research activity and productivity. Productivity of a full-time faculty member (FTE-research) increased significantly on average from 1.1 articles in 2000-2001 to 2.6 articles in 2002-2003.

Table 4: Summary of Publications, 2000-2003

Publication Type	2002-2003	2001-2002	2000-2001
Publications in refereed journals	59	37	27
Publications in non-refereed journals	0	0	1
Book	1	2	1
Edited book	0	2	0
Book chapter	8	4	2
Research reports (published)	8	3	8
Total	76	48	39
<u>Publications in Journals:</u>			
Articles	54	34	22
Letter or note/book review/brief report	5	3	6
Total	59	37	28
Total FTE (research)*	21.00	19.00	19.25
Article per FTE (research)	2.6	1.8	1.1
<u>Publications from Conferences/ Presentations/Others:</u>			
Oral presentations/ conference papers/ posters	38	31	20
Others (graduate theses & other)	13	3	3
Total	51	34	23

* Refers to 'research active' faculty which includes all full time faculty of professorial rank, as well as those lecturers and instructors who are involved in research programs and projects.

Total	4	16	13	0	1

Note: Duplicate articles might be published by authors from different departments within FHS and were added in all corresponding departments, hence the larger numbers (the totals are the numbers of every type of publication).

Table 7: Number of Publications by Department, 2000-2001

Publication Type	Environmental Health	Epidemiology & Population Health	Health Behavior & Education	Health Management & Policy	Medical Laboratory Technology
Publications in refereed Journals	9	14	2	3	0
Publications in non-refereed journals	0	0	0	1	0
Book	0	1	0	0	0
Edited book	0	0	0	0	0
Book chapter	1	1	0	0	0
Reports (published)	5	1	1	1	0
Total	15	17	3	5	0
Articles	9	9	2	3	0
Letter or note/book review/brief report	0	5	0	1	0
Total	9	14	2	4	0
Oral presentations/ Conference papers/ Posters/Abstracts	7	6	5	2	0
Others: Graduate Thesis/Projects	0	3	0	0	0
Total	7	9	5	2	0

Note: Duplicate articles might be published by authors from different departments within FHS and were added in all corresponding departments, hence the larger numbers (the totals are the numbers of every type of publication).

Tables 8 and 9 describe the range of interdisciplinary and collaborative research produced by FHS as evidenced by co-authorship between FHS departments and with outside institutions from the academic years 2000-2001 to 2002-2003. Out of the total journal publications, the proportion of publications co-authored (1) within one department at FHS has increased from 14.8% to 18.2%, (2) across the five departments has increased from 7% to 12.7%, and (3) with outside institutions has decreased from 92.6% to 74.5%. The proportion of publications with FHS faculty as lead author has increased from 46.4% to 62.7%.

Table 8: Distribution of Journal Publications by Co-authorship

Academic Year	% Co-Authorship within one department at FHS	% Co-Authorship across departments within FHS	% Co-Authorship outside FHS	% Lead Author from FHS
2002-2003	18.2	12.7	74.5	62.7
2001-2002	8.6	31.4	82.9	56.8
2000-2001	14.8	7.4	92.6	46.4

Table 9: Distribution of Journal Publications with Co-authorship from Outside FHS

Academic Year	% Co-authorship within other Faculties at AUB	% Co-authorship with national researchers	% Co-authorship with regional researchers	% Co-authorship with international researchers
2002-2003	40.7	17.6	5.9	27.8
2001-2002	34.3	29.4	9.4	18.8
2000-2001	33.3	44.4	0.0	29.6

APPENDIX A

Journal quality

Currently, FHS does not have its own ranking of journals in terms of quality of publication. Members of FHS are increasingly publishing in reputable international journals as judged by the Impact Factor or the rank of journal in subject as classified by the Institute for Scientific Information (ISI). The Impact Factor is one measure of ranking, evaluating and comparing journals. It is an index of the number of times an ‘average article’ in a journal has been cited in a particular year. There are variations between disciplines, and journals should therefore be viewed in the context of their particular field. The Rank in Subject column represents the journal’s ranking in its field. The following table shows a *partial* list of international journals publishing papers by faculty members over the past three years.

Table A1: List of Journals Publishing Research Works by FHS, 2000-2003

Journal Title	Impact Factor	Subject	Rank in Subject
Acta Ophthalmologica Scandinavia	1.124	Ophthalmology	21/41
Addiction	2.877	Substance abuse	1/19
American Heart Journal	3.300	Cardiac & Cardiovascular Systems	10/70

APPENDIX B

**American University of Beirut
Faculty of Health Sciences
Research Committee
Guidelines for Proposal Evaluation**

According to the University Research Board's (URB) policy guidelines for faculty research grants, the Faculty Research Committee (FRC) must review, evaluate and approve all grant applications. The following describes the process of review and evaluation of proposals followed by the FRC.

1. All applications must meet the eligibility (and other) requirements of faculty research grants as stipulated in the URB Guidelines of April 17, 2003.
2. All applications should include the Office of Grants and Contracts URB cover sheet signed by the Department Chairperson, and a covering letter addressed to the FRC Chairperson.
3. There are no forms required for applications to URB grants, but proposals must be typewritten (preferably in MS word), and must include the following items.
 - a. Covering page, including title of the proposed project, applicant's name and email address, departmental affiliation, and total amount requested.
 - b. Summary of project of no more than one page.
 - c. Project description of no more than 10 pages (double spaced).
The description may include the objectives and significance of the project, materials and methods of analysis, relation to current research in the field (a concise literature review).
 - d. Bibliography
 - e. Itemized budget and work plan
 - f. Statement of any current or potential funding sources (with amounts requested).
 - g. CV of main investigator
4. The original and 5 copies of each complete application must be submitted to the Chairperson of the FRC two weeks prior to the deadline set by the URB.
5. The Chairperson of the FRC screens each application to determine eligibility and to ensure that it meets the minimal requirements as described in the URB written guidelines and the FRC instructions as described above. Incomplete proposals will be rejected or returned to the PI for minor revisions.
6. After the initial screening by the FRC, investigators may be asked to submit an electronic version of their proposals to the Chairperson of the FRC.
7. Two members of the FRC will be designated as principal internal reviewers of each proposal and will complete the FRC standardized Evaluation Form prior to the Committee deliberation.

8. The FRC will seek the opinion of at least one external reviewer to (anonymously) evaluate each proposal according to the FRC Evaluation Form, and to give an overall evaluation score of the application (1. Strongly recommended, 2. Highly recommended, 3. Recommended, or 4. Non recommended). The chairperson of the FRC will select external reviewers in consultation with members of the FRC
9. All members of the FRC will review all proposals and participate in the deliberations of each one (other than their own, if any).
10. The FRC, after discussing the reviewers' comments, will ask the investigator to respond to the reviewers' concerns and submit a revised (preferably electronic) version of the proposal.
11. The FRC will study the revised version of the proposal in light of the reviewers' comments and will assign a priority score based on (1) the reviewers' recommendations, (2) the track record of the investigator, and (3) an anonymous voting by all members of the FRC, excluding those who are submitting proposals as PIs.

Evaluation of Research Proposals

Reviewer: _____

Title of Proposal: _____

Investigator: _____

Department: _____

Please write your evaluation of the proposal according to the items listed below. You may send us your review by electronic mail to mk36@aub.edu.lb. Thank you.

-
1. **Research question:** Is the statement of the problem clear enough to be summarized? Is there a well-defined rationale (theoretical/practical) for undertaking the study?

 2. **Originality/State of the art:** Is the study novel in terms of approach or theory? Does the proposal reflect command of current body of knowledge in the field?

 3. **Theoretical framework/Literature review:** Does the problem ‘sit’ within a conceptual framework or theory? Does the research question build on previous research? Is review of the literature selective (critical)? Are major concepts clearly defined? Are hypotheses (if any) clearly stated?

 4. **Research design:** Is the design adequate given the stated problem? Are methods of data collection, sampling procedures, method of evaluation/analysis clearly identified? Are they suitable? Any discussion regarding reliability/validity of measures selected (if appropriate)?

 5. **Significance/Importance:** Does investigator identify the significance of the problem? Is the statement convincing? Usefulness for policy/intervention and/or public health? Significance to the field? Potential for publications?

 6. **Ethical/Political considerations:** Any discussion of ethical issues – if relevant? IRB review?

7. **Feasibility:** Are the plans realistic/achievable? Does investigator have access to data and/or subjects? Is timetable realistic? **(For internal reviewers)** Does investigator have necessary competence/experience to undertake the study?

8. **Budget:** Is budget about right (i.e., reasonable), given the purpose of the study? Is it itemized?

9. **General comments:**

Overall evaluation: __1. Highly recommended
__2. Strongly recommended
__3. Recommended
__4. Not recommended

APPENDIX C

Sponsored Research Grants, 2002-2003

Title	Funding Organization	Investigator	Contract Start Date	Contract End Date	Budget
<u>Sponsored Research Projects – International Agencies:</u>					
Charting of the Med. Child Report	Gaslini Foundation	Khawaja	1-Aug-03	Open	\$3,360
Exploring potential impact of preconceptional care including folic acid supplementation on pregnancy outcomes in three countries of the Middle East	UCLA	Tamim	15-Jun-03	31-May-05	\$16,000
Therapeutic Decisions at Menopause	Harvard School of Public Health	Khawaja/Deeb	1-Mar-03	31-Aug-04	\$58,967
