

Dr. Hala Darwish is currently an Associate Professor at the Hariri School of Nursing. Since 2011. She serves as the Managing Director of the Abou-Haidar Neuroscience Institute and Nehme and Therese Tohme Multiple Sclerosis Center at AUBMC. Her area of clinical specialty is cognitive neuroscience, and her translational research focuses on cognitive functions and rehabilitation, and factors leading to cognitive impairment and improvement; such as traumatic brain injury, aging and vitamin D. She is proficient in both basic science and clinical research. She has ongoing research projects investigating cognitive impairment in Multiple Sclerosis and Traumatic Brain Injury. She was the recipient of the NIH training and individual research grants and has presented her work at national and international forums. Dr. Darwish is a member of the Nursing Honor Society - Sigma Theta Tau and a fellow of the American Academy of the Nursing, and other international and national professional organizations. She has authored several research papers and reviews about the topic. Dr. Hala Darwish received her undergraduate nursing degree and a teaching diploma from the American University of Beirut and then completed her masters as an acute care nurse practitioner and a doctorate in bio-behavioral nursing with a neuroscience concentration at the University of Michigan in Ann Arbor in 2007. Two years later, she finished her post-doctorate fellowship at the University of Illinois in Chicago.
