Monique Chaaya, DrPH is Professor of Epidemiology and the Chairperson of the Department of Epidemiology and Population Health at the Faculty of Health Sciences. Her main research interests focus on two priorities in public health, mental health and tobacco control. She conducted cross sectional and longitudinal studies on mental health of vulnerable populations, specifically older adults, displaced populations, prisoners of war, and pregnant women. She validated in Arabic several mental health scales such as the Arabic Geriatric Depression Scale (GDS), the Arabic Perceived Stress Scale (A_PSS) and two dementia scales, 10/66 DRG and A-RUDAS (Arabic Rowland Universal Dementia Assessment Scale). Her current research focuses on the epidemiology of dementia and the wellbeing of caregivers of people living with dementia.
