

Dr Albert El Hajj is an Associate Professor at the American University of Beirut Medical Center. After graduating from the Saint Joseph University in Beirut, he completed his robotic and minimally invasive surgery fellowship in Paris at Montsouris, Henri Mondor and Saint Joseph hospitals. He joined AUBMC in July 2013 where he founded the Robotic Urology program. He was also instrumental in developing the endourology program at his institution with his expertise in flexible ureteroscopy, laser enucleation of the prostate and the introduction of the Aquablation and Rezum procedures. Dr El Hajj's main clinical and research interests are uro-oncology, minimally invasive surgery and artificial intelligence.
