

2. **HEALTHCARE DESIGN SERVICES :**

EMA, in collaboration with various AUB departments and its selected consultants, assists Clients in ensuring cost-effective design services based on international standards. EMA can either review the design documents, or can carry out the design through its internal or external resources and affiliates in order to ensure efficient and effective design. Our consulting teams are chosen from an experienced and diversified pool of staff and sub-consultants for every specific project; they have extensive in-depth experience with all types of hospitals and healthcare organizations, and they possess the latest information on trends, regulations, and advances in technology in health care. Services include medical planning, equipment planning, equipment specifications, healthcare interior design, IT planning, materials management services, kitchen, laundry, healthcare electro-mechanical services, etc.
