

**3. OPERATIONAL DESIGN / RE-DESIGN SERVICES :**

EMA works closely with Management and Design/Construction teams to ensure that the clinical/educational vision of the healthcare institution is suitably integrated with the physical setup under development, and with the operational systems and requirements - designed to support the hospital vision. Through its vast expertise in “Evidence-Based-Operational-Design-Services”, EMA will assist the institution in designing and implementing internationally recognized and more efficient, effective, safe, and up-to-date health care delivery systems.
