

Kamal Feghali

Mr. Feghali, **Plant Engineer**, has been at the employ of AUB since 1991. He has shown tireless commitment to his work. He is described to frequently put his work and commitment to do the job above his own personal needs and personal time off. He is described as a leader who is diligent to complete his projects in a timely and cost effective manner.

He is prompt, innovative and resourceful. He provides on the spot solutions to his “clients”, always putting them at ease.

Mr. Feghali is a highly devoted person. He once had to report on duty on Christmas Eve to solve a plumbing problem in one of the Faculty apartments. He managed to fix the leak and clean the apartment with only one helper, as most staff were off duty, and returned to his home to celebrate with his family, albeit late, but never before finishing his duties to his clients.

Throughout his career, he has been serving AUB with dignity and pride in his work.
