

Mohamad Khaled Joujou

Electrical Laboratories Engineer- Electrical and Computer Engineering Department (ECE)

Khaled Joujou is shown to be a valuable asset to the Faculty of Engineering in his abundant history of serving AUB. He is currently an instructor and the ECE Lab Manager, and his work in carrying out all his duties and additional services has been commended in his nomination letters. He is viewed by his colleagues as a leading contributor in many ECE initiatives including automation projects, instructional workshops, and the development of ECE labs. He was also a key provider of technical assistance to a large variety of areas in engineering, aided numerous graduate students in their time of crucial need, and voluntarily provided his services to the department in numerous occasions beyond the scope of his job requirements.

He is acclaimed by, largely, the entire department of ECE and other departments in the Faculty of Engineering. His interview and the many signs of immense satisfaction from his colleagues show Khaled's qualifications in service excellence.
