

Nadia Moufarrej

The Student Career Center at FEA would not even exist, much less be the resounding success it has become, had it not been for Mrs. Moufarrej.

Nadia joined AUB in 2005 and, through her hard work and ingenuity, she was able to develop the role of this office from a small counseling and placement function to a full-fledged Career Development Center that is being emulated throughout the campus.

Current as well as former Engineering students seek out Mrs. Moufarrej for her useful advice and caring support. She is uniformly praised by students she interacts with, and is always mentioned as a reference point.

Her dedication to Engineering students is the stuff of legend. At one point, while Nadia was on her summer vacation in Virginia, she got a phone call from a stranded FEA student at Carnegie Mellon University, all the way in Pittsburgh. She drove over 700 km to help that student and make sure that he was well taken care of.

Nadia Moufarrej exhibits an uncompromising commitment to the Faculty of Engineering and its students, and has done an outstanding job of improving the services that this university provides.
