

Nibal Safah

Ms. Safah's career at AUB spans over three decades. She is considered by her colleagues and supervisors as a pillar to the success of the Psychiatry Department.

When asked about her, she has been described by her peers and her clients as extremely dedicated and committed to Service Excellence no matter how difficult and demanding the requests are.

When you meet Nibal and talk about her work, you are immediately struck by her enormous amount of empathy, passion and dedication. She treats the Psychiatry Department and AUB at large as her home. She is concerned about people's well being and tries hard to offer solutions even when the area of concern is not within her scope of services. She managed to change the smokers' section near the St. Jude Cancer Center to another location, just because she felt that the young cancer patients and their families should not be subjected to second hand smoke when they came to the Center. Many such examples are testimony to her tireless efforts to help and serve the AUB community.

It is individuals like Nibal that make AUB fulfill its message of excellence and dedication.
