

## **Rabab Abi Shakra**

Efficiency and dedication best describe Rabab. Rabab joined AUB in 1995 and has been consistently proving to her peers as well as her supervisors her dedication, team spirit and willingness to serve beyond her "job description" to satisfy and help her department be more organized and efficient.

She describes herself as a mom away from home to all the students who come into her office for help, Rabab goes the extra mile to make sure the FEA students are well taken care of. Cordial visits from former ECE majors are testimony to how much Rabab has positively affected the lives of these students during their undergraduate years.

In the ECE Department, Ms. Abi Shakra is credited with various initiatives that improved the scope of operations. One of the most significant achievements is commencing an ABET (Accreditation Board for Engineering and Technology, Inc) recommended structural flow for the department that optimized the flow of the work during the busiest times at the Department, such as the registration period.

Rabab's exemplary service with a smile to the students, faculty and staff are paragons of AUB's mission.
