Regional Conference
Building the Case for Sustainable Transportation in the Arab World

Current Arab transportation systems have a significant impact on national energy and transportation policies and on the daily lives of people.

This regional conference will shed light on sustainable transportation policies in the Arab world; and the resulting economic, environmental, and health impacts of shifting towards more sustainable transport systems.

The program includes presentations from IFI funded research studies as well as the work of researchers from the UK, UAE, Egypt, Qatar, and Lebanon.
