

THE LANCET

Commission on Syria

Health in Conflict

Fouad Fouad

Fouad M. Fouad, MD, is general surgeon by training. Now he is Assistant Research Professor at the Faculty of Health Sciences, and Co-Chair Director of the Refugee Health Program, Global Health Initiative (GHI), American University of Beirut (AUB).

Dr. Fouad's current research interests focus on Syrian displacement inside Syria and the neighboring countries, as well as the impact of this crisis on their health and well-being. Prior to relocating to Lebanon, Dr Fouad served as the Director of Primary Health Care in the Syrian Ministry of Health, during which time he led many public health programs. From 2002-2012, Dr Fouad served as Director of the National Institute of Health (NIH)-funded Syrian Center for Tobacco studies, where he coordinated multiple health promotion studies. Fouad is a co-author in several commentary publications in The Lancet as well as the international Journal of Public Health on assessing the Syria's health crisis and the response to this devastating event. Currently, he is a PI of a project funded by Mailman School of Public Health, Columbia University on Refugee Health Policy with focus on NCDs among Syrian refugees in three countries; Lebanon, Jordan and Turkey.

He is the lead author in a recent UN-ESCWA publication, which examines future policy options for health system rebuilding in post conflict Syria.

Fouad is serving as a commissioner in two Lancet Commissions; AUB Lancet Commission: Syria and the crises in global governance, health and aid, and UCL Lancet Commission on Migration and Health
