Note: All investigators and participating personnel must have documentation showing certification in the FMBC Biosafety training program. This certification must be done on an annual basis.

2. PRINCIPAL INVESTIGATOR'S ASSURANCE

The signature certifies that the PI understands and accepts the following obligations in this study:

- I recognize that as the PI it is my responsibility to ensure that this research and the actions of all project personnel involved in conducting the study will conform with the FMBC recommendation
- I will inform the FMBC of any unanticipated biosafety related problems encountered while doing the research.
- I will notify the FMBC of any change in the protocol.
- I will not initiate any change in the protocol without prior FMBC recommendation and approval.
- I will maintain all required research records on file and I recognize that representatives of the FMBC are authorized to inspect these records.
- I accept responsibility for the safe conduct of the experiments to be conducted and will see that all associated personnel are certified in the safe laboratory practices required for this work.
- I will oversee the development and implementation of the standard operating procedures for equipment and safety practices guidelines inside the laboratory.
