AUB - Global Health Initiative

Global Health Initiative, American University of Beirut—June 2017

The Global Health Initiative recognizes World Refugee Awareness Month through daily health facts about refugees worldwide.

ABOUT THE GLOBAL HEALTH INITIATIVE

The Global Health Initiative is the foundational phase of the Global Health Institute (GHI) within the American University of Beirut (AUB) envisioned as part of the new vision on health, Health 2025. The Global Health Institute is the first such freestanding institute in the Middle East and North Africa region (MENA), and one of the very few in the Global South.
